

Content Hacker and Creative Writer

Project Title	Content Hacker and Creative Writer
Project Summary	Build and synthesize documents and visual graphics related to employee engagement and culture. Interview NASA employee focus groups, research existing documentation, and provide written insight for easy digest. Present new products to senior leadership. Draft Agency wide workforce communications.
Country	United States

Project Description

NASA is the #1 place to work in the Federal Government for 7 straight years. Our agency has continued to be the front runner in employee engagement, innovation, and collaboration. We continue to build a great working environment because of our dedication to understanding, listening, and developing our workforce. This internship will continue this important work within the Office of Human Capital Management as it relates to leadership development and workforce culture. The internship will consist of a number of small special projects and work that will change throughout the year as many important initiatives come up. This is a great opportunity to understand the variety and breadth of work within human capital as it relates to an organization's culture.

Required Skills or Interests

Skill(s)

Editing and proofreading

Infographic design

Research

Survey / polling design

Writing

Additional Information

Must have an interest in benefiting humankind! The ability to effectively collaborate with various teams,

providing the most useful guidance in an enthusiastic and inspiring manner. A sparkling personality that will mesh well with the existing NASA family and a smile on their face a majority of the time. Experience working with designers, developers, and team focused creative process.

Example Work:

Content Hacker and Creative Writer will read/become familiar with agency supporting documents and interview selected focus groups in order to determine content that is most important to be included in the New Employee Handbook (no more that 15 pages front and back). They are responsible for creating the content and the visual graphics to support it (NASA has a graphic department that can support this effort if graphic support is needed). They will work independently and manage their own time/work flow with weekly tag-ups with a POC from NASA Office of Human Capital Management (OHCM). A finalized document is due before the end of their time as an intern and a presentation of the product is given to OHCM leadership.
